# Jobs Board - Phase 2

Phase 2

New page

Now that we have implemented the login, registration, and home page (still static), it is time to code the job details page exactly as designed below with static data. Try to code it **as similar as possible**.

Routes & Navigation

Your users journey should be this one:

URL: /login
Login

URL: /
Home

URL: /jobs/:id
Job Details

URL: /sign-up
Registration
